

Product Data Sheet

Q-313 MULTI-PURPOSE MIST ADHESIVE

Fast Tack, Mist Spray, Long Working Time, Cost Effective

Features

- Designed to bond various substrates and surfaces
- Long Open Time
- High Temperature resistance to shear failure
- Fast Drying and aggressive bonding strength
- Great for permanent and temporary bonds

Description

Quality Aerosols Q-313 is a Multi-Purpose mist adhesive that can be used for many types of substrates and surfaces and will give you a very aggressive permanent or temporary bond. Q-313 is a versatile adhesive that can be used virtually on any substrate, such as paper, cardboard, fabric, foam, wood and many other plastics. It has a fast drying time and is great for use in the arts and crafts area. This adhesive is Non-Chlorinated.

Applications

Used for the permanent or temporary bonding of paper, cardboard, fabric, foam, wood and many other plastics. Q313 is fast drying and has a very aggressive bonding tendency.

Product Usage

Q-313 is designed to be applied to the two surfaces about to be joined, but can be used with just one side. Spray an even coat of adhesive to cover 80% to 100% of the surface. Do not wet the surfaces. Allow to dry 2 to 4 minutes. For crucial areas such as foam or fabrics, it is recommended to apply a coat to both surfaces for a great bond. For best results spray on the first coat of adhesive and let it get tacky and then spray a second coat. This will allow for a great permanent bond. Best to use when the temperature is approximately at a room temperature of 70°F.
