- Great for Wood and Particle Board
- VOC Compliant
- Fast and Effective

Description

Quality Aerosols VOC Compliant Contact Adhesive is a high strength fast tack, high shear adhesive. Our adhesive is specially formulated for permanently bonding high pressure laminates to substrates, such as wood, particle board, plywood and many other surfaces. It can also be used for making permanent bonds to other compatible non-porous and porous surfaces. Works great with all the Do-It-Yourself projects around the house.

Applications

Used for the permanent bonding of high pressure laminates to other substrates such as wood, particle board, plywood, stone, wallboard and others.

Directions

Shake can before use for approximately 60 seconds. Make sure surface is free of dust, dirt, oil, wax, rust and loose paint. Surface must be completely dry. Turn Applicator to the width of pattern required (High, Medium or Low). Spray both substrates and allow adhesive to cure (approximately 2-3 minutes). Then press both substrates together for approximately 3-5 minutes.
