

Product Data Sheet

Q1000 Cold Press/Hot Press Multigrip PVA

Ease of Use, Uniform Results, High Solids

Q1000 Cold Press/Hot Press Multigrip PVA

Features

- Type II Water Resistance
- High Solids
- Hot Press or Cold Press and Radio Frequency Curing
- Excellent Green Strength
- Easy Clean-up

Description

Quality Aerosols Q1000 Cold Press/Hot Press Multigrip PVA is a pre-catalyzed wood adhesive known for its uniform results. Q1000 has excellent impact resistance and a high percentage of wood fiber failure. It is good for gluing wood, pressed wood, chip core, laminate, veneer, and Masonite to wood and to itself. Q1000 is also successful with other cellulosic materials providing that at least one surface is porous to allow moisture to leave the glue line.

Applications

Used for the permanent bonding of wood, particle board, plywood, FRP board, laminate, cloth, paper, leather, felt, veneer and many other common substrates.

Product Usage

Q1000 can be applied by any conventional method and will pass Type II specifications for water resistance. Q1000 can be used in hot press, cold press, or radio frequency machine applications, in addition to, roll coaters, extruders, squeeze bottles, or application by brush.

Storage

Store in a cool, dry, and well ventilated area. Do not handle or store near open flame or other heat sources. We recommend storing at or above 65°F. Keep from freezing. Bulk products should be kept off the floor.

Product Specifications

Color	Wet - green/black Dry - Clear
Solids	50% +/- 2%
VOC Content	0%
VOC Compliant CARB/OTC	Yes
Bonding Range	0-10 minutes
Dry/Tack Time	Immediate
Spray Pattern	Roll, brush, or spray
Sizes Offered	45#, 495#
Warranty Period	1 year from manufacture date
Not Freeze-Thaw Stable	
Recommended layout	2-5 g/ft²
