Product Data Sheet

Q8300 Non-Oily Citrus Adhesive Remover
Industrial Grade, Aggressive Citrus Cleaner

Q8300 Citrus Adhesive Remover

Features
- Biodegradable
- Aggressive Citrus Cleaner
- Great to Remove Adhesive Overspray
- Good on Painted Surfaces
- No Oily Residue

Description
Quality Aerosols Q8300 Non-Oily Citrus Adhesive Remover is formulated as an industrial, biodegradable, aggressive citrus cleaner, and adhesive remover. The aerosol and canister delivery system allows for even controlled application. Q8300 can be used on almost all surfaces and substrates, including painted surfaces, glass, porcelain and concrete. It is compatible with some plastics and vinyl. Q8300 leaves no oily residue.

Applications
Q8300 citrus based adhesive remover. Q8300 can be used for removing adhesive over spray off of laminate, edge banding and a variety of substates. Not safe on all plastics. Test on an inconspicuous area for color fastness or discoloration before use.

Product Usage
Q8300 Citrus Adhesive Remover is formulated as an industrial grade, biodegradable, natural cleaner and adhesive remover. Spray directly on the surface to be cleaned and allow Q8300 to sit on the surface for a 2-3 minutes. If there is heavy dirt or adhesive buildup, use a brush to help penetrate Q8300 into the built up adhesive on the substrate. Using a brush will insure a quicker clean up. Do not spray Q8300 on glue line. This could weaken the bond. Spray on cloth when cleaning near glue line of substrate. Wipe off the residue to finish cleaning the area.

Storage
Store in a cool, dry, and well ventilated area. Do not handle or store near open flame or other heat sources. We recommend storing at or above 65°F. Bulk and canister products should be kept off the floor.

Product Specifications

Color	Clear
Solids	NA
VOC Compliant CA/OTC	
Aerosol:	Yes
Cylinder:	No
VOC Content	18%/ 147 g/L
Spray Pattern	Mist
Sizes Offered	14 oz, 9#
Warranty Period	1 year from manufacture date
