Metal and Paint Renovator

Features

- Removes Particulate Debris and Contamination
- Removes Embedded Grains of Metal
- Removes Dead Pigment
- Specifically Designed For The DO-IT-YOURSELFER
- Leaves Your Car in Show Room Condition

Description

Speed Clay was specifically designed for the Do-It-Yourselfer. No Clay Bar to Mess with. Professional results with high tech chemistry. Speed Clay removes particulate debris and contaminates that washing and polishing can't. Our unique product Speed Clay, will remove embedded grains of metal, tree sap, airborne environmental dispersants and paint over-spray. Speed Clay isn't hazardous to your paint, but it is strong enough to take your paint back to that showroom shine. Use Quality Aerosols Waterless Wash & Wax after application for a long lasting and protective shine.

Applications

Restores brilliance to dull, discolored or mineral deposits, heavy tree sap, airborne environmental dispersants and paint over-spray.

Directions

Shake can before use for approximately 30 seconds. Tilt can upside down and apply a 3-4" circle of Speed Clay to start the application. Rub foam into the paint in a circular motion. Let sit for 15 seconds & Speed Clay will haze up. Wipe off with a clean cotton cloth applying pressure in a circular motion. Repeat the above steps for badly damaged paint surfaces. After the second coat is removed finish the process with a clean microfiber cloth, buffing the paint surface to a fine shine.
