## Q313 Multi-Purpose Mist Adhesive

Fast Tack, Mist Spray, Long Working Time, Cost Effective

### Q313 Multi-Purpose Mist Adhesive

#### Features

- Designed to Bond Various Substrates and Surfaces
- Long open time
- High temperature resistance to shear failure
- Fast drying and aggressive bonding strength
- Great for permanent and temporary bonds

#### Description

Quality Aerosols Q313 is a non-chlorinated, multi-purpose mist adhesive that can be used for many types of substrates and surfaces and will give you a very aggressive, permanent or temporary bond. Q313 is a versatile adhesive that can be used virtually on any substrate, such as paper, cardboard, fabric, foam, wood and many plastics. It has a fast drying time and is great for use in arts and crafts projects.

#### Applications

Used for permanent or temporary bonding of paper, cardboard, fabric, foam, wood and many plastics. Q313 is fast drying and has a very aggressive bonding tendency.

#### Product Usage

Q313 will give a permanent bond when applied to both surfaces to be joined, or a temporary bond when applied to only one side. Surfaces need to be dry and free of oil and debris. Spray an even coat of adhesive to cover 80%-100% of the surfaces. Allow to dry 2-4 minutes. For crucial areas it is recommended to apply a coat to both surfaces for a great bond. For best results spray on the first coat of adhesive and let it get tacky and then spray a second coat. This will allow for a great permanent bond. Best to use when the temperature is 70°F or higher.

#### Storage

Store in a cool, dry, and well ventilated area. Do not handle or store near open flame or other heat sources. We recommend storing at or above 65°F. Bulk and canister products should be kept off the floor.
